

Create Your Own Vision Plan.

VSP® EasyOptions

VSP EasyOptions gives you the power of choice you've come to expect and appreciate on a daily basis in a most unexpected place—your vision benefits.

A Plan Created By You, Not For You

You shouldn't have to settle for a one-size-fits-all vision plan. With VSP EasyOptions, you're the designer—tailoring a plan that fits your needs. You and each member on your plan will automatically get the essentials, like exam, frames, and lenses. Then you take it from there, personalizing your coverage beyond the basics with an enhancement you want.

How to use your VSP EasyOptions:

1. Register for an account or log on to vsp.com once your benefit is effective.
2. Review your benefit coverage, eligibility, and find a VSP doctor.
3. Visit your VSP doctor and discuss which upgrade best fits your needs.

That's it! VSP and your doctor will take care of the rest.
